Fast detection of communication patterns in distributed executions Thomas Kunz, Michiel F. H. Seuren

November 1997 Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research CASCON '97

Publisher: IBM Press

Full text available: pdf(4.21 MB)

Additional Information: full citation, abstract, references, index terms

Understanding distributed applications is a tedious and difficult task. Visualizations based on process-time diagrams are often used to obtain a better understanding of the execution of the application. The visualization tool we use is Poet, an event tracer developed at the University of Waterloo. However, these diagrams are often very complex and do not provide the user with the desired overview of the application. In our experience, such tools display repeated occurrences of non-trivial commun ...

Operating system's structures: Sub-operating systems: a new approach to application

security

Sotiris Ioannidis, Steven M. Bellovin, Jonathan M. Smith

July 2002 Proceedings of the 10th workshop on ACM SIGOPS European workshop

Publisher: ACM Press

Full text available: pdf(136.37 KB) Additional Information: full citation, abstract, references

Users regularly exchange apparently innocuous data files using email and ftp. While the users view these data as passive, there are situations when they are interpreted as code by some system application. In that case the data become "active". Some examples of such data are Java, JavaScript and Microsoft Word attachments, each of which are executed within the security context of the user, allowing potentially arbitrary machine access. The structure of current operating systems and user applicati ...

6 Guidance for the use of the Ada programming language in high integrity systems.

B. A. Wichmann

July 1998 ACM SIGAda Ada Letters, Volume XVIII Issue 4

Publisher: ACM Press

Additional Information: full citation, abstract, citings, index terms Full text available: pdf(2.93 MB)

This paper is the current result of a study by the ISO HRG Rapporteur group which is being circulated for comment. Many people have contributed to this, but those who have either attended two recent meetings of group or have made substantial e-mail comments are: Praful V Bhansali (Boeing, USA), Alan Burns (University of York, UK), Bernard Carre' (Praxis Critical Systems, UK), Dan Craigen (ORA, Canada), Nick Johnson MoD, UK), Stephen Michell (Canada), Gilles Motet (DGEI/INSA, France), George Roma ...

8 Business process modeling: Use of six sigma to optimize cordis sales administration and order and revenue management process

Angel Rivera, Joe Marovich

December 2001 Proceedings of the 33nd conference on Winter simulation WSC '01

Publisher: IEEE Computer Society

Additional Information: full citation, abstract, references, citings, index Full text available: pdf(295.79 KB) terms

Cordis Corporation, a Johnson and Johnson Company, undertook a project to reduce the sales representatives administrative tasks by 50% and to optimize the Order & Revenue Management Process for its customers. The existing process was complex, consisting of numerous handoffs, nonintegrated systems, and duplication of work. Due to these issues, sales representatives and sales administration were spending too much time managing errors and non-value added tasks instead of being able to focus on the ...

Cooperating knowledge-based assistants for the office

A. Roger Kaye, Gerald M. Karam

October 1987 ACM Transactions on Information Systems (TOIS), Volume 5 Issue 4

Publisher: ACM Press

Full text available: pdf(2.12 MB)

Additional Information: full citation, abstract, references, citings, index terms, review

This paper presents an approach to high-level support of office workers by embedding office knowledge in a network of distributed cooperating knowledge-based or expert "assistants" and servers. These knowledge-based systems incorporate both factual and procedural knowledge and are capable of making use of existing conventional office technology. They constitute a form of computer-supported cooperative work. We describe a common architecture for our assistants and servers that in ...

10 Ada Semantic Interface Specification (ASIS): frequently asked questions

July 1995 ACM SIGAda Ada Letters, Volume XV Issue 4

Publisher: ACM Press

Full text available: pdf(796.31 KB)

Additional Information: full citation, index terms

11 A secure infrastructure for service discovery and access in pervasive computing Jeffrey Undercoffer, Filip Perich, Andrej Cedilnik, Lalana Kagal, Anupam Joshi April 2003 Mobile Networks and Applications, Volume 8 Issue 2

Publisher: Kluwer Academic Publishers

Full text available: 🔁 pdf(308,34 KB)

Additional Information: full citation, abstract, references, citings, index terms

Security is paramount to the success of pervasive computing environments. The system presented in this paper provides a communications and security infrastructure that goes far in advancing the goal of anywhere-anytime computing. Our work securely enables clients to access and utilize services in heterogeneous networks. We provide a service registration and discovery mechanism implemented through a hierarchy of service management. The system is built upon a simplified Public Key Infrastructure t ...

Allan, Sergio Guzman-Lara, Tom Kalt

July 2002 Proceedings of the 2nd ACM/IEEE-CS joint conference on Digital libraries JCDL '02

Publisher: ACM Press

Additional Information: full citation, abstract, references, citings, index 

We describe the core components of the architecture for the National Science Digital Library (NSDL). Over time the NSDL will include heterogeneous users, content, and services. To accommodate this, a design for a technical and organization infrastructure has been formulated based on the notion of a spectrum of interoperability. This paper describes the first phase of the interoperability infrastructure including the metadata repository, search and discovery services, rights management services, ...
